SGR Fiberglass Packaged Systems

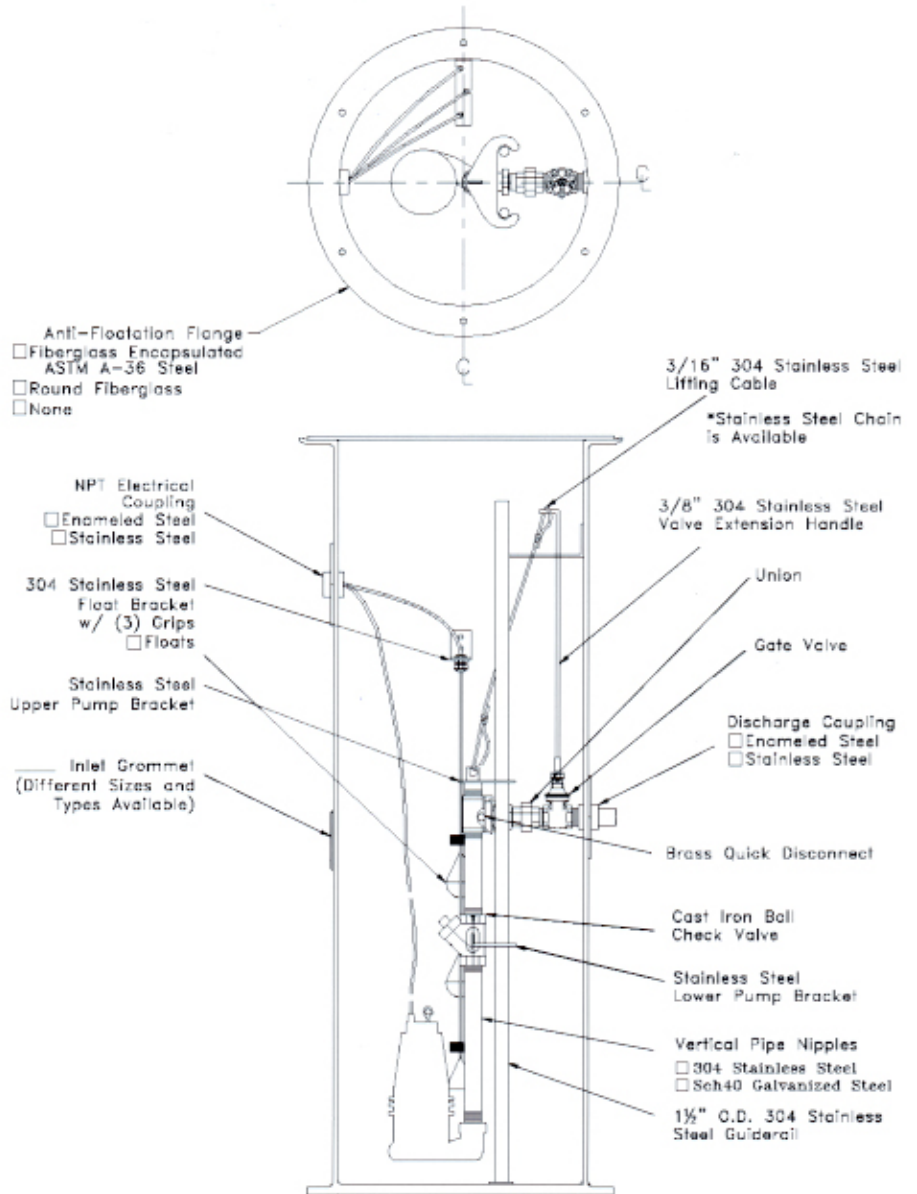

SGR Guiderails & Accessories

Topp Industries, Inc. offers an all non-corrosive Stainless Steel Guiderail system (SGR) with a brass disconnect. SGR systems can be installed in our fiberglass basins at our facility or can be sold separately.

The SGR is constructed of 1-1/2" O.D. 304 stainless steel rails with a removable cast iron ball check valve. SGR systems can be installed in our fiberglass basins at our facility or can be sold separately.

Standard 8' rail systems consist of (2) 4' x 1-1/2" O.D. stainless steel guide rails. We offer 12", 24" & 48" extensions for applications deeper than 8'.

Topp Industries' SGR can also be made as a seamless one-piece construction available up to 20' in length. Consult factory for pricing and shipping requirements.

8 ft. SGR Guiderail System packaged in a 4 ft. box & Ready for UPS Shipment
